

## Export

### TTS > File op PC

Programs and scores of the Tacx Trainer software can be exported to a different location on your PC, or to BikeNet on the Tacx VR web site. Your file will be included in the ranking on BikeNet.

Using **File tab Search** on the right you can easily look for a score in the Tacx Trainer software.

## Search

### Name search

Type a name in the field and press the magnifying glass icon

Using the icons at the top right hand corner you can determine the way everything is shown in the selection list. You may choose from **Today**, **This week**, **This month** and **All**

With **Before**, **After** and **calendar** you can indicate the limits of your search for scores. This function can be activated by ticking the appropriate box. If a score is available in the calendar at a certain day this will be made visible by the colour orange.

With **Select Training type** you can determine the training type (if ticked) of which the scores are visible in the selection field.

## Export

There are three different screen choices from which to search for files you wish to export. Training programs. When exporting these you will have only the program. With a Real Life Video or ErgoVideo you also have the possibility to select a partial course for exportation by means of the button **Looking at course**. If there are scores from a selected Training program or Course, you also have the possibility to export a score by means of the button **Looking at Scores**.

When you export a score, the course or program this score was obtained for will automatically be sent as well.

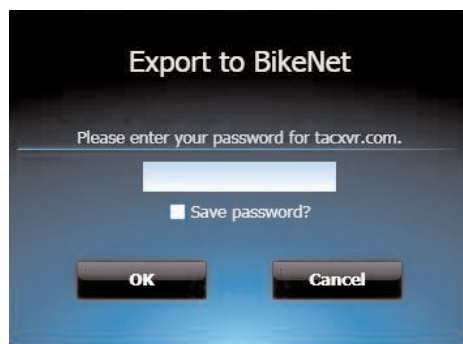

After selecting the score or courses you choose **Export**. A browse screen will appear in which you can choose the location to save the file to.

### Export to BikeNet

When choosing this, your score will be sent directly to the Tacx BikeNet page on the VR web site.

**NB** the function only works if the score was ridden by the user currently selected.

A pop-up will appear where you can type the password you have generated in your user profile. After confirmation, the score was sent to the web site.

### Export to XML

This is where you export a score file, which you can process in a different program later. A browse screen will appear in which you can choose the location to save the file to.

### TTS -> Bushido Export

It is possible to transfer all training types from the Tacx Trainer software to your Bushido computer. Prior to the transfer the course of a Real Life Video, ErgoVideo or Real Life Training will be shortened to 99 routes so that you can ride these on the Bushido ergotrainer.

After selecting a course you choose **TTS -> Bushido** and a pop-up with an adjusted name (16 characters long) based on the original course name will appear. You can change this name if you wish. After clicking the **TTS -> Bushido** button again, the course is transferred.
