

Help

This is where you will find the different help functions and additional information.

Installed videos

Opens a screen with all Real Life Videos and ErgoVideos.

Online FAQ

Opens the FAQ chapter on the Tacx web site.

Online Help

Opens the manual on the Tacx web site.

Tacx on the web Direct link to the Tacx VR site.

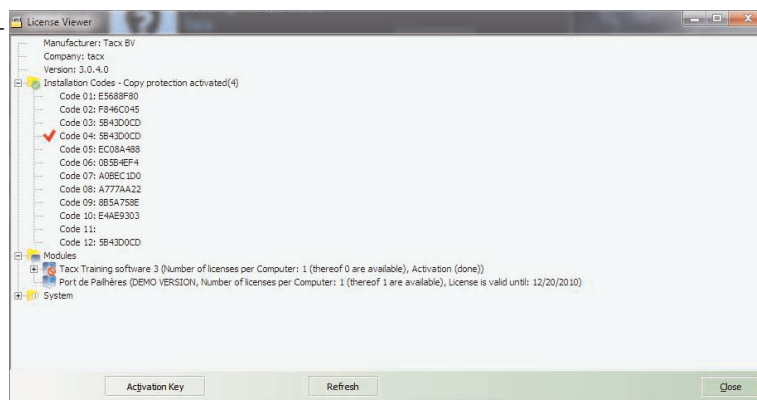

Over

Opens a pop-up with the disclaimer for the Tacx Trainer software.

Show license info

This screen shows the installation code that was generated at the time of installing the software - after filling in the activation code. This license entitles you to using the Tacx Trainer software 3.0.

NB: This code has no bearing on the Multiplayer. It is a user code. The Multiplayer license is activated through the Tacx web site.

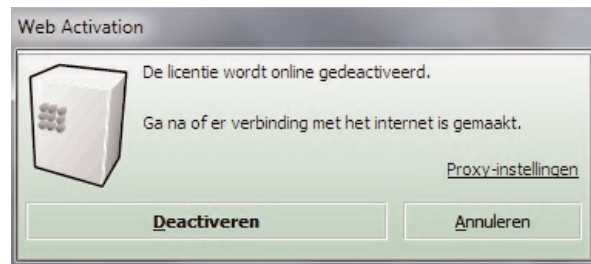

Click on **Activation key** when you experience problems with the user license. Enter the license number (you'll find it on the sticker inside the DVD box) and follow the instructions on the screen. If you still have problems after this, send us an e-mail with a screen dump of this screen to support@tacx.com.

Export license info

Opens a Browse screen that will help you to save the license info in a txt file somewhere on your PC. This way the info may be sent in when the Tacx Service Centre asks you for it.

The license is given out for 1 PC. When you wish to start using the software on a different PC will you are able to do so by using the button **License transfer**. The user license will then be deactivated. On the other PC you can use the button **Activate License** to reactivate the user license.

This function can only be used when you are connected to the internet. Make sure your PC's Firewall and/or virus scanner do not block the communication.
